

## **Notes**

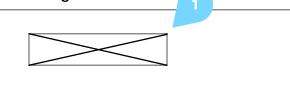

- 1.1. Beau's logo link to the Beau's site 1.2. LCBO API logo - link to the LCBO API site
  - 1.3. Image show this if its populated
- 1.4. Beverage name this should be the title font assuming this is always there
- 1.5. OPTIONAL include concise, useful info
- 1.6. Shortcut to Beer Finder view of full-screen (see 5)
- 1.7. Placeholder if there is no image
- 1.8. Remember to account for long names

### Questions

1. Do we know which seasonals are available, when?

A: Doesn't look like it based on the data.

## 2. Loading Indicator

\$20.38

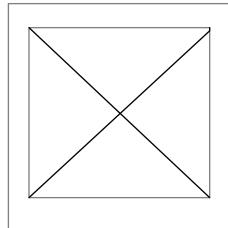

Beau's A Really Long Named Beer Like That

Infinity Mirror Brett IPA

750mL bottle

2.1 - Loading Indicator appears in the area on Home where the products will be displayed. It would be fun to do something like "Tapping the keg", "Removing bottlecap", etc. but this will probably load too fast to load that sort of thing. We'll stick with a simple animation. Would be cool to animate the Beau's logo, though.

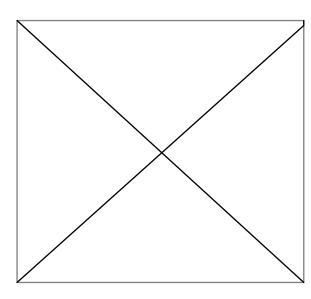

## 3. Empty Products Message

Oh noes! There must be something wrong... we'll look into it right away! Check back again in a few minutes and hopefully we'll have it sorted

3.1 - Page that gets displayed if the call to the API fails. We should show a different message if there are no seasonal beverages found.

## 4. Product Details

## Beau's the Tom Green Beer

\$16.00 4x600mL bottle

⟨ ⟩ Beer Finder

The late addition of organic New Zealand hops gives this weissbier a fragrant nose with notes of citrus and tropical fruit. Pouring a hazy pale gold with a medium head, the palate is pleasing with ripe peach and citrus balanced by light spice notes. Creamy in texture the finish replays light spice and subtle bitterness.

4.1. Beer details - we'll assume that these fields are all populated

4.2. Beer Finder - links to the Beer Finder view

4.3. Beer write-up - unfortunately there is no data integrity around this. We'll have to aggressively adapt the data to be able to get something even approximately like this. In real life, we'll probably have a better write-up available.

4.4. Clicking the close button takes you back to the product page, so remember to retain state. However, the fact that we have a full screen view here should allow us not to render the underlying page for better performance.

## 5. Beer Finder

# Notes

- 6.1. There is additional info for the store.
- 6.2. Icons for special details: - Accessibility (spelled wrong in the API)
- Parking - Transit access
- Beer Cold Room
- 6.3. Telephone now includes fax.
- 6.4. The hours includes the entire week. Note that the day names would be localized in real life.

- **Notes** 5.1. Link back to the Beer Details view
- 5.2. Show the searched for beer name
- 5.3. Closing takes them back to the Home view
- 5.4. Postal code input we'll auto-populate this with a best-guess service when we first load the view. After the user changes it, their entry should be saved. Ideally we'd save with session storage... not sure if there's privacy concerns with that. For now, we'll lose this when they

close the browser or refresh, so it'll live in the local JS store. Changing this will make a new call and refresh the list of stores.

- 5.5. This will toggle the full store information. This is because the full hours and store details
- creates lots of visual noise.
- 5.6. This is the whole list. Note that we'll have to display the loading indicator. 5.7. Derived from `distance\_in\_meters` field. We'll have to convert from meters, and also clean
- up the display of numbers for locale. 5.8. Derived from the 'quantity' field. Remember that these numbers will need localization for >
- 5.9. The address will have to be combination of:
- `storeNumber` - `addressLine1`

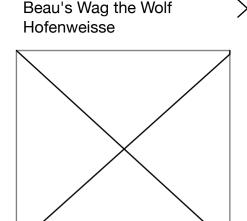

- `storeNumber`

- `addressLine2` may be `null`
- `city`
- Always assume Ontario - `postalCode` - I guess we can add this, but I don't see why it would be necessary. Remove
- from the wireframes for now. - 'telephone'
- 5.10. These have to be derived from several fields. They also need be be calculated from
- minutes from midnight.
- `sunday\_open`, `sunday\_close` - `monday\_open`, `monday\_close`
- `tuesday\_open`, `tuesday\_close`
- `wednesday\_open`, `wednesday\_close` - `thursday\_open`, `thursday\_close`
- 'friday open', 'friday close'
- `saturday\_open`, `saturday\_close`

the postal code they enter above as the origin.

- Also, this section is collapsible (see 6). It will default to closed. 5.11. These telephone numbers come formatted like this.
- 5.12. The Directions button takes the user to Google Maps using either Current Location or else

**Notes** 

4x600mL bottle The late addition of organic New Zealand hops gives this weissbier a fragrant nose with notes of citrus and tropical fruit. Pouring a hazy pale gold with a medium head, the palate is pleasing with ripe peach

and citrus balanced by light spice notes.

Creamy in texture the finish replays light

spice and subtle bitterness.
